

20 & 25 LITRE RANGE

ROUND | RECTANGULAR | SQUARE

Our round, rectangular and square 20 and 25 Litre containers are manufactured in various weights using high-density polyethylene. We can advise you on the weight and shape most suitable for your needs depending on SG (Specific Gravity) requirements, density, UV sensitivity, storage and transportation of your product.

BENEFITS

Polyethylene is strong, safe and versatile...

- » providing excellent **resistance to corrosive chemicals**;
- » is suitable for storing **acid and alkaline liquids**, as well as **organic solvents**; and
- » is **contamination free** and **hygienic**.

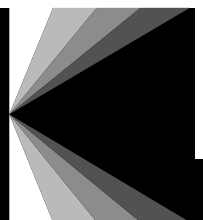

The containers are...

- » **lightweight and strong**;
- » easy to handle and store;
- » easy to **fill** and **decant**.

CUSTOMISING THE CONTAINERS

We assist customers with customising their containers through...

- » **Silk screen printing** in two colours for customers who require their company information, contact details or directions for use on their packaging.
- » The application of **self-adhesive labels** including the required information.

20 & 25 LITRE ROUND

FEATURES
