

5 LITRE RANGE

HEXAGONAL | RECTANGULAR

Our 5 litre range of products is available in hexagonal and rectangular shapes and is made from high-density polyethylene. We manufacture our containers in weights starting from 100g up to 340g. We are able to advise you on the weight and shape most suitable for your needs depending on SG (Specific Gravity) requirements, density, UV sensitivity, storage and transportation of your product.

BENEFITS

Polyethylene is strong, safe and versatile...

- » providing excellent **resistance to corrosive chemicals**;
- » is suitable for storing **acid and alkaline liquids**, as well as **organic solvents**; and
- » is **contamination free** and **hygienic**.

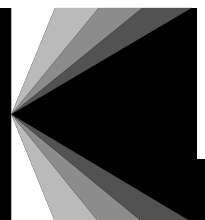

The containers are...

- » **lightweight and strong**;
- » easy to handle and store;
- » easy to **fill** and **decant**.

CUSTOMISING THE CONTAINERS

We assist customers with customising their containers through...

- » **Silk screen printing** in two colours for customers who require their company information, contact details or directions for use on their packaging.
- » The application of **self-adhesive labels** including the required information.
